   Double bore trim, Multi-Point gear & trim
The Greentree Door Company, a division of Top Quality Building Products, a second generation family-owned business that opened its doors in 1967 by Robert Banschbach. He passed his ever-growing and changing company onto his son Mark Banschbach.

Top Quality is still a masonry company selling brick and stone as well as fireplaces, windows and doors. Mark expanded into the door industry 2002 by purchasing the 100 year old Goshen Door Company and creating the Greentree Door Company.

Greentree manufactured steel and fiberglass doors and expanded its product offering to wood doors in 2008 with the purchase of Beveled Glass Designs. Today, Greentree Doors offers a vast selection of steel, fiberglass and wood entryways with our specialty being mahogany and knotty alder wood doors and a cherry grained fiberglass option along with iron doors.

Our team at Greentree prides itself on offering a selection comparable to any of the large door companies, customer service that treats you like you are part of the family business, and prices that beats them all.

Greentree's “Above and Beyond” - What it means to me and my door.

| Ability to cut your door to the rough opening | Whether your house is new or 100 years old, your new door will fit! |
| Veneered Solid Wood Doors | Because it's real... wood, the chances of a wood door cracking are very good, so our doors have 2 wood veneers around a wood core (stave core) which means if your door does crack, the crack will not go all of the way |
| Multi-Point Locks | Recommended for all 8 foot doors to help prevent door warpage, but also adds another layer of security and peace of mind. |
| Ball-Bearing Oil Rubbed Bronze Hinges | Most of our competitors will upcharge you for the elegance of these hinges, but they are standard on our doors. They give a fluid motion to the operation of your door. |
| Industry Standard Glass Sizes | If you ever get tired of the glass design in your door, you can get a new design from anywhere (Did we say “anywhere”, we mean us). |
| Ultimate Astragal | No step stool required to reach flush bolts at the top of your 8 foot door. The latch and bolt plates are adjustable. |
| Bumper Sill on all Double Wood Doors | Adds extra protection from the elements by providing a continuous seal along the bottom of the doors. |

Factory Finishing

* Halogen oven cures the finish just like the paint on your car (no, it will not look like your car due to different materials, and the fact that automotive paint is $400+ per gallon). |

* All six (6) sides of the doors are finished |

Water-based Paint & Stains

* Wood does not like water and will find its way behind your hinges and handleset and will most definitely hit the top of the door, right? It's just a good idea. |

* Offers lower Volatile Organic Compounds. VOCs - the stuff that smells and can make you sick. |

* We seal all of the wood panels on our pre-finished wood doors. |

Pre-Stain Condition our wood doors

* Floating panels are supposed to expand & contract with the weather. We seal the panels with elastomeric (elastic & flexible) caulking to keep Mother Nature out. |

Hand Sanding

* A craftsman will hand sand your door vs a machine so that he can feel and fix any roughness or imperfections before the door is stained or painted.

shown on mahogany wood

Colors shown here may vary from actual application due to uncontrollable factors such as the lighting in your room and monitor settings. See your Greentree dealer for actual samples.

The Greentree Finish . . . . like no other

Our finishers at Greentree understand that once you put a finish on a door, it can either make-it or break-it. That’s why Greentree has invested time and money into transforming the finishing process into an art. We take the time necessary to produce a silky smooth finish that magnifies the grain of the wood and intensifies the color of the stain.

From the beginning with the crucial initial sanding that lays the ground work for the staining process, to the clear-coating of every surface of the door including the back side of the glass stops and behind the hinges, our doors will show their natural beauty to the max.

Have Greentree finish that new Greentree door and watch your customers express their gratitude with awe.
Handing & Swing Guide

LEFT HAND
1. Single Door
   INSIDE
   OUTSIDE

2. Double Door
   Active Door
   INSIDE
   OUTSIDE
   Passive Door

3. Single Door
   INSIDE
   OUTSIDE

4. Double Door

   OUTSIDE
   Active Door
   Passive Door

RIGHT HAND
5. Single Door
   INSIDE
   OUTSIDE

6. Double Door
   Active Door
   INSIDE
   OUTSIDE
   Passive Door

7. Single Door
   INSIDE
   OUTSIDE

8. Double Door
   INSIDE
   OUTSIDE
   Active Door
   Passive Door

To determine the handing & swing of your existing door, open the door and place your back against the hinges.
- If it opens to your left & inside = left hand inswing
- If it opens to your left & outside = left hand outswing
- If it opens to your right & inside = right hand inswing
- If it opens to your right & outside = right hand outswing

Example: configuration #3 = left hand outswing

Exterior Door Exposure & Maintenance Guide

Instructions: Find your door and/or frame in the left column and your exposure with condition. Where the two intersect is your maintenance guide.
(i.e. a wood door stained with a south exposure and full sun will be a HIGH maintenance.)

*Never paint plastic door moldings a dark color
*Storm doors should always be vented to avoid heat build-up
### Entry configuration and dimensions

Dimensions listed on this page are for real wood doors & sidelite. Fiberglass doors are 1/4” less in width per door and 1” in height. Fiberglass sidelite are 1” less in height. Wood & fiberglass double doors use a common astragal and are listed at a common height.

Multi-Point Gear Systems

Multi-Point Locks are required on 8 foot doors to maintain warranty

G-U Wolverine (for double doors)
Multi-Point Active / Inactive Gear
The Wolverine 3-point locking system features double reinforced shoot bolts, top and bottom for maximum security and protection against warping of the doors.
Also featured is the 90 degree locking mechanism that incorporates a standard US cylinder offering a variety of Schlage “C” type keyway systems.

G-U Eagle (for single doors)
Multi-Point Active Gear
features automatic locking with 1” deadbolt and two additional 3/4” latches which become deadbolts for maximum security and protection against warping of the door panels
U.S. design with deadbolt above latch.
A decorative glass entry is an elegant way to make your home both unique and charming. Its classical looks mean it never goes out of style, providing you with many years of enjoyment. It makes a beautiful entryway both inside and outside, and its solid construction helps keep your energy costs down. Greentree Doors offers a wide selection of doors, sidelites, transoms and decorative glass entry systems; prehung and prefinished.
